ACTIVITY GUIDE

DISGUISED ANIMALS

Learn about the agamids, animals that, through disguise, can pass unnoticed. Real camouflage champions !

ENVIRONMENT

This presentation will encourage youth to adopt environmentally responsible behaviour towards the environment. Our animator will plant the seed of ecological consciousness by touching on topics such as pollution, deforestation, climate change, etc.

EVOLUTION

Learn more about the evolution process and various environment pressures that promote the appearance or disappearance of certain organs or limbs. They will meet members of the skink family which are constantly evolving.

NUTRITION

Not all mammals eat the same way. Learn about the dental system and feeding patterns of these mammalian representatives !

LOCOMOTION

Boidae representatives will be happy to show you that it is not necessary to have legs to move. Discover different types of snake locomotion and be a witness of it.

SENSES

Learn how strange animals that, at first glance, have neither eyes or ears, can know and perceive their environment with this sensory theme !

TELL ME, DO YOU MAKE A NOISE ?

Croaking ! This is how the amphibians that you will discover during this activity communicate. Try to learn their different noises and find the hidden message behind !

WILDLIFE OF QUÉBEC/CANADA

Discover little-known animals that look like or are part of the same family as our endemic species of Canada.

FORT BOYARD

Challenge youngsters in this animation filled with special animals and fun challenges !

TRIP AROUND THE WORLD !

Being part of the rodent family brings its share similarities, but what about differences ? Find out how rodents have adapted to their different living environment.

ECOLOGICAL NICHE

Discover the beautiful and diverse family of geckonidea ! In this activity, students will prepare an ideal habitat for each individual.

REPRODUCTION

How does reproduction take place in lizards? Ovoviviparous or oviparous ? Parthenogenesis? Learn more on the different methods of reproduction used by our reptilian friends !

SEDUCTION

Humans are not the only ones to have particular techniques when it comes to seduction. Discover the means used by turtles in order to seduce their companion !
